Acknowledgements

My deepest gratitude to His Holiness Sri Avinash Singh Jee of hallowed memory. At the time when I was about to venture into my second innings as an Astrologer, I went to seek Guruji's blessings. The moment he set his eyes upon me, he called out "Jyotish Jee!". I was dumbfounded and just nodded my thanks. This only reinforced my belief that I was going in the right direction.

To my dear Mother Smt Gargi Devi & Father Sri Anil Jha, my biggest Fan, for having faith in me and instilling in me a sense of confidence that whatever decisions I will take, I will be successful.

To My dear wife Shalvi Kashyap, without her encouragement and unstinted support, I would not have dared to start my Astrology website and write this book.

Thanks to my younger brother Sumant Kumar Jha for all kind of support & Suggestions.

Thanks to Mayank Kumar Rizu for helping me in writing the contents of the book.

Thanks to Vikash Sharma and Nikhil Kulkarni- without all your support and feedback I could not have imagined this work to be completed.

Last but not the least special thanks to Shivangi Jha, without her guidance and endless effort, this book could not take shape.

Dedication

This Book is dedicated to my first GURU - My mother Smt Gargi Devi and my Father Sri Anil Jha. Without their sacrifice, guidance and firm hand, I would not be the man that I am now. Without them I am nothing.

I love you both with all my heart.

Introduction to the Book

First things first- this piece of work is a conversation not a dictate. Those seeking thrill and shortcuts to success through the science of astrology- sorry to disappoint you are in a wrong place.

Conversation is an art and an important one more so. This is why this Numerology book is different from others in the same genre. When you ask someone about astrology they tend to give a nonchalant reply at first but open up only later about their true views when they are sure no one is around judging them. Such a scenario has developed because over a period of time astrology in the public view has become less of a science and more of a superstition. And why not they believe so- there are numerous cases where so called astrologers have duped people of not only money but their beliefs as well. They have made a larger part of society dependent on their services using fear as a weapon making them redundant in thoughts and labour. But then again they are not conversing with the seeker rather they are communicating through fear.

This book is firstly and most importantly a conversation with you dear reader. I would like to reintroduce to you the science of Numerology. It does not predict anything which is void of hard work. It does not propagate superstition. It only takes you to a journey where every incident has a scientific and cosmic reason. Numerology prepares you for hardships to come, teaches you the ways to endure, and motivates you to keep on the journey to achieve your goals. Somehow people believe that Numerology is for those who are uneducated and practiced by those who did not really achieve anything in life. Well sorry for the bummer in advance- I am a successful Software Engineer currently working in the USA for a world renowned firm; I have a beautiful family and along with my full time job I enjoy & practice my innate passion for Vedic Astrology & Numerology. Like other educational and vocational courses Astrology has also been part of my growing up

curriculum. And so the way my academic and vocational studies are contributing positively to society I thought it was time that my Vedic Astrology knowledge too should be of service to society in all positive ways.

This book deals with everything basic about Numerology that you want to know about Numerology. It has in detail all kinds of calculations (mathematical) that one should do in order to find the answers. You would be surprised how easy and practical this cosmic science can be!

Have a Great Read!

Jayant Kumar

Preface

Everyone is interested in knowing their future and Astrology is the only subject which studies the cosmic science.

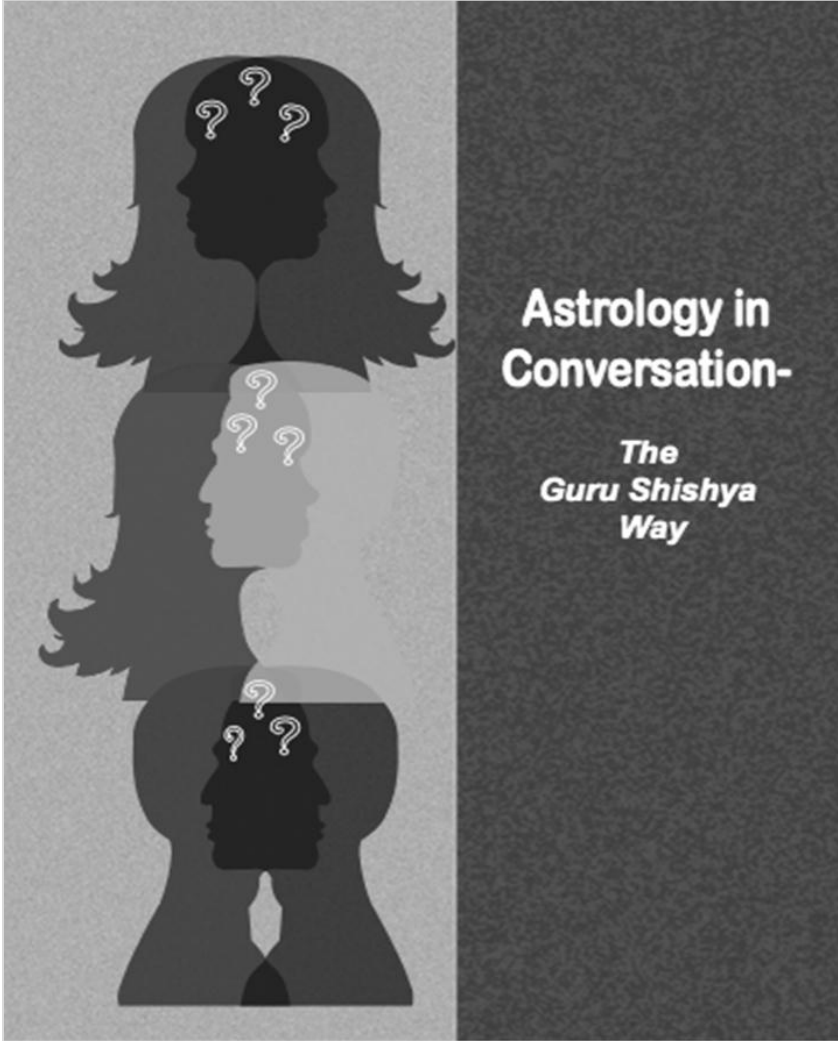

There are a lot of people attracted towards astrology with majority inclined towards learning this mystic science. But unfortunately people don't know how to approach astrology as a subject and learn its basic concepts. They must know the tools to explore the cosmic science.

There are several books written on Numerology. Moreover, now days, a lot of website on the internet claim to provide learning Numerology, but lack in the planned systematic approach to beginners quest. Most of the books and internet articles fail to provide the knowledge and the process which would help a beginner learn and further explore Numerology. Because of this, the learner gets tangled in the complex approaches, difficult terminologies and too technical a language and finds the subject of numerology boring and difficult to grasp. This makes the new learner to quit the subject in between or be confused forever.

I have written this book to keep all these points in mind. I have given importance to the learner and kept all the topics which are not relevant to learner away from this book. I have designed this book more as a conversation rather than text book. I have put all the topics step by step so that student can learn this mystic subject with interest.

I hope you will enjoy this book and explore the cosmic vibration as much as I enjoyed while writing this book.

All the very best! Happy Learning!

A Discussion between Curious Numerology Student & Experienced Numerology Teacher.

Student: Respected Sir, I heard a lot about Numerology. Does it really work? Can I learn this subject?

Teacher: Yes, why not? Anyone can learn this science and answer to your first question- This works. But I am not sure what are the things you heard about this pious science?

Student: Frankly speaking Sir, I tried to learn Numerology using Books available in market and on internet. But I did not get the concept of Numerology and how these numbers are related to my life. The concept is really confusing and I end up with several numbers with no use.

Teacher: I can understand from where you are coming. There are lot of websites and books available in market which claims to teach Numerology. In fact there are several books and website which is available in market which gives really great information but when it comes to basics, I hardly find any book or website which gives step by step approach to learn this pious science.

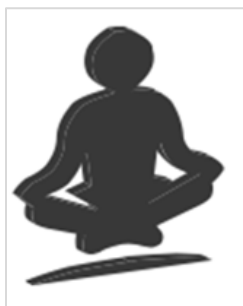

Student: Exactly, this is what I am feeling about available resources. However, Can you please help me to understand Numerology concept. Also, you can consider me a complete dumb because I may ask you very silly question.

Teacher: You must ask questions, there is nothing wrong about it. Like every other subject, numerology also will take time to understand. If you don't get it in the first place then don't worry or feel bad about that.

Student: Sir, request you make it very simple so that I can related it to real time scenario.

Teacher: Yes sure, I will try my level best to make it as simple as possible.

Student: Thank you very much Sir.

Teacher: Let's do prayer together before starting the lesson.

Guru Brahma Guru Vishnu

Guru devo mahesheara.

Guru sakhshat ParBrahma Tashmai

Teacher: Let's begin...

Consider this world as a big stage and every one comes here to play a particular role. As per their role they get reward in life and in next life as well.

Student: Got it

Teacher: Now consider you are going to play a particular role in this life on the stage. If somebody asks you what are the things you are going to do, the characteristics of your role and other details, will you be able to answer them?

Student: NO. I will not be able to say what role I am going to play.

Teacher: Exactly! Having said that, using numerology, you can get to know the purpose of your life, the path you are going to travel and other details. In numerology we call this a **Life Path Number**.

Student: So you mean to say, If this world is a stage then this life path number will tell me about my role, the areas of my performance, skills, weaknesses etc. Basically my complete journey.

Teacher: You got it. This number tells you about your path your soul will travel in this life. Since it is getting calculated using your Date of Birth, so you will have only one Life path number throughout your life.

Student: Perfect. That makes sense. Now I got to know detail of my role in this life :-).

Teacher: Knowing role is not enough. You need to know what special skills you have.

How you see the play or stage. What is your perspective about this play? If you are aligned with the given role then definitely you will enjoy the role but if your interest/skill and perspective is different from your role then there will be conflict.

Student: I agree.

Teacher: In numerology this special skill, your talent and perspective towards your life is called **Birthday number**. This gets calculated based on the date you were born, not your entire birthday.

Student: So Life path tells what roles I am going to play, my challenges and opportunities during my role. And Birthday number tells how I am approaching the role, special talents I can perform in this role. Correct?

Teacher: Yes.

Teacher: Now, you know your role and special skills. But the question is, how are you going to perform that role with given skill. Suppose if you are playing a role of King then how well you are playing a role of King. How you are expressing yourself as a King to the world. This number which helps you to know how are you going to express yourself towards your life path is called Expression number. This number is also called Destiny number. Basically this number tells you how you are destined to express yourself towards your life path.

Student: Wow! More details about my role. Even though I might be king, it does not

confirm whether I am playing the role perfectly or not. This Expression number will help me to know how well I am performing this role, right?

Teacher: Yes. Not only this, Expression number will also help you to know your strength and area of improvements so that you can make yourself better performer in your role.

Student: That's awesome. But how to calculate this Expression/Destiny number?

Teacher: That I will teach you later but as of now, you just remember this number gets

calculated based on your Name.

Student: I never paid attention that my name is also playing crucial role towards my life journey.

Teacher: Yes it is.

Teacher: Now, lets go little deeper in finding your area of interest and strength. Because if you know your strength you can use it while playing your role. The number which tells you your Strength or area of interest is known as Hidden Potential Number and it is getting calculated based on your Name again, which I will tell you later.

Student: Ok. But I must know my area of improvements or shortcomings so that I can improve. Will numerology not help in finding out my area of Improvements?

Teacher: Yes it does. That is my next number. The number is called Karmic Lesson Number. This number helps you to know the area of improvements. This number tells you which areas you need to improve so that you can fulfill the purpose or your life path.

Student: So you mean to say if I will not work on my shortcomings I will not be able to play my role.

Teacher: Yes, it tells you to improve because to perform as per expectation or with your full potential you must assimilate these qualities in your life.

Student: Got it

Teacher: But did you ever thought, the role you are performing how other people are seeing that. I mean to say, if you are playing a role of King then other people look at you as a Brave king, weak king or what kind of king. What is your personality to the world.

Student: Oh My God! I never thought in that way. I thought if I am a king, people will perceive me as I think.

Teacher: No it is not always the case. You might be brave king as per your perspective but for others you seems to be cruel. So these things can be known by a PERSONALITY number.

This number tells you how other perceives you. The kind of personality you possess to the world.

Student: That's awesome. So it is again calculated based on my name?

Teacher: Yes.

Teacher: Now, you know you are playing a role of king. You came to know about your strength and perspective to see the role. You got to know how you are expressing yourself towards your role. You also got to know how other people perceive you in a King role. But this is what you want in your life. You must have some wish. You must have some desire at bottom of your heart which you want to achieve. That desire, that wish is called Heart Desire Number or Soul urge number.

Student: That's right. I might play a role of King but my heart always wants to help people. I feel happier when I help someone.

Teacher: You are right. The role is given to you by your Life Path number but you should also know what your Heart wants. So once you know what your heart truly wants then whatever your role may be, you can incorporate the things your heart wants and

then you will feel more satisfaction. This number also gets calculated using your name.

Student: Oh my God...there are so many numbers and all the numbers seem to be important. Let me memorize all the numbers: Life Path Number, Birthday Number, Expression Number, Hidden Potential Number, Karmic Lesson Number, Personality Number and Heart Desire Number.

Teacher: Perfect!

Teacher: Life path number, Birthday number, Expression number, Personality number and Heart Desire number these five numbers are building blocks for your life. This will help you to know yourself better. These Five numbers (Building blocks) are called CORE NUMBER.

Student: Oh so these are the CORE numbers. I read in several places about this but was not able to relate to it earlier. Now I get it.

Teacher: You remember, I told you in starting as per our role we get reward in this life and in next life as well.

Student: Yes Sir. I remember.

Teacher: So let me elaborate for you. Numerology believes in re-birth and as per their past karma they reap the fruit in this life as well. So if you have done good then you will also get good but if you have done bad then you will face some burden in this life. In numerology, we called this Burden as KARMIC DEBT NUMBER. There are four two digit number which are called KARMIC DEBT NUMBER.

Student: Oh that's scary. So where this Karmic Debt Number does comes from? I mean is it getting calculated using my Date of Birth or using my Name?

Teacher: You don't need to calculate it separately. Karmic Debt number can be found in any of your CORE NUMBERS. We will discuss later how to calculate it.

Student: Wait I think we have already discussed about Karmic Lesson number. Are Karmic Lesson number and Karmic Debt number both not the same?

Teacher: I am impressed with your memory. Glad you asked this question. Most of the students get confused between these two numbers. Answer to your question, both are different numbers. Karmic Lesson number tells you the area of improvement and Karmic Debt number tells you the Burden or challenge you will face due to your past karma.

Student: I am little concerned about this Karmic Debt. Since we have already done something wrong in the past life and now we are facing Burden/Challenges, is there any way we can minimize the affect?

Teacher: I got your point. Since we cannot go back to our previous life to correct our Karma, the Burden/challenges we face can be fixed here to an extent. For Every Karmic Debt Number there is a solution which helps you to reduce your Burden. I will tell you all the details later.

Student: That's great and now I am little relaxed.

Teacher: So, you are playing the role of a King but have you ever thought that your complete role as a King will not be the same? You may face some challenges or get some opportunities during your complete span of the journey?

Student: Yes, everyday is a new day and we get different experiences. So only knowing my role and how my path will be, cannot be of much help. We also need to know our journey in the frame of time.

Teacher: Yes. In Numerology we divide the complete life path (your age) into four parts. And each part is not equal. This division is again based on your date of Birth.

Student: Ok got it.

Teacher: Each part of your life creates some challenges & opportunities for you. The part is called Cycle in numerology. So each cycle that brings challenge to you is called Challenge Number- a major learning for you so that you can use it while

going through your path. And the Cycle that brings you opportunity is called Pinnacle Number.

Student: So you mean to say that there are two different numbers and both have four cycles (part)- one brings Challenges and other brings Opportunities. The one which brings the Challenge is called Challenge number and other, which brings opportunity, is called Pinnacle number.

Teacher: Yes. You got it.

Student: Since each cycle is nearly 25-30 years long, will I get the same challenges or opportunities for 25-30 years of my life?

Teacher: Not exactly. Suppose one cycle is for 30 years. It will give you idea about the areas of opportunities in these 30 years time. But we can also calculate how the particular year will be for you. I mean how will be your 2016, 2017 etc. This particular year analysis is called PERSONAL YEAR NUMBER and ESSENCE CYCLE NUMBER.

Student: Ok. That will help.

Teacher: If you see carefully then you will find, you get to know your full life span using Life Path number. You divide your full life span into four cycles and within each cycle you can analyze each year.

Student: So you mean to say when we analyze any particular year I should also consider my life path, Challenge and Pinnacle number as well?

Teacher: Yes, then only you will get relevant information. And also, not only year, you can also calculate Month and day :-).

Student: That awesome. So I can come to know how will be my tomorrow?

Teacher: Yes. Now can you summarize whatever we discussed? Let us see your memory power :-)

Student: If we consider this world as a stage then *Life Path number* tells us about our role and its complete journey in the play.

Birthday number tells us our special gifted skills and basically how we perceive the play and our role in it.

Expression number tells me how we are expressing ourselves towards our role.

Hidden potential number tells about our area of interest and strength

While *Karmic Lesson number* tells about area of improvements, our shortcomings.

Personality number tells about how we are perceived by others.

Heart Desire number tells what exactly we want from bottom of our heart. These Five numbers *Life Path number*, *Birthday number*, *Expression number*, *Personality number* and *Heart Desire number* are called **CORE numbers**.

We also discussed about some burden or challenges in this life due to past bad karma. These can be seen through **KARMIC DEBT NUMBER** and this number can come in any of our **CORE NUMBERS**.

In our further discussion we figured out the whole life span is not same. We may face some challenges and may get some opportunities. So we divide whole life path into four cycle and for each cycle we analyze what challenges we will face. *Challenge*

number tells us about challenges on each cycle and *Pinnacle number* tells about opportunities on each cycle.

At last we discussed **PERSONAL YEAR NUMBER & ESSENCE CYCLE NUMBER** which helps in analyzing a particular year and gives deeper insight of time in that particular year.

Teacher: Impressive. You summarized very well. So my dear, this is how you can come to know about yourself in all the angles. Knowing yourself is the key.

Student: Sorry to interrupt you, but on internet there are several other numbers available.

Teacher: Yes there are several other numbers available in Numerology but as a beginner I don't want to confuse you. These are the numbers very crucial once you do mastery over these numbers then only you should go for other numbers. Otherwise you will get confuse.

Student: Respected Sir, you told me this complex subject in very easy way and moreover in a practical way. Can i ask you one more question?

Student: 'Knowing yourself is key' is correct but where else can I use numerology?

Teacher: I am impressed with you. Since you have now asked me this question and you are very serious about this subject, I will tell you the secret.

We all receive cosmic Vibrations. These cosmic vibrations help every living/non-living species to complete their journey on this planet. So from where do we receive these cosmic vibrations? We are getting these energies from planets & stars continuously. Some energies are in favor of us and some are not in favor of us. We don't know how to channel these energies to help ourselves for a better life.

Thanks be to our ancestors who analyzed these energies and mapped them to numbers and alphabetical characters. When you see these numbers, do not look at them just as a number rather, see these numbers as energy and understand what these energies can do. The more you understand these numbers, the more you will get to know about pattern of life.

All the Astrologers in this world have mapped these energies into different entities. Numerologists have mapped it against Numbers. Vedic Astrologers have mapped it to Planets and Constellations. Palmists have mapped it to Lines and Mounts and so on. Ultimately these are all energies and once you understand their characteristics, you will be able to decode their potential.

Student: I am speechless. I never thought in this way.

Teacher: Now, if you see the whole world you see Numbers and Alphabetical characters. It is either the country or city you live. It is your phone number, your Car number plate or your cubicle number where you work. Everything has been marked against number or letters. When you know the meaning of the numbers you know the kind of vibration it is bringing to you.

Student: Got it but how will i know whether that energy will suit me?

Teacher: There are some numbers which are compatible with your Life Path number and there are some which are not. So by considering your Life Path number, you have to judge whether the calculated City number, phone number or cubicle number will bring what kind of results. But remember, don't judge quickly. It takes time and practice. Remember, there is nothing good or bad energy. Energies, all, have some particular role to perform. Your perspective decides whether it is good or bad.

Student: That's awesome. Now I can use numerology to analyze the actual meaning behind each number. Like my name number gives me insight about myself in the same way, city name number will give insight about its details.

Teacher: Yes exactly. Now you get the concept of Numerology. But remember one thing- *NUMEROLOGY MUST BE USED FOR BETTERMENT OF SOCIETY. IT IS NOT ABOUT GETTING PROFIT FOR YOURSELF. AS LONG AS YOU ARE MAINTAINING BALANCE IN SOCIETY USING NUMEROLOGY, IT WILL REVEAL its SECRET.*

Student: Sure I promise, I will use it for betterment of society and I will never use Numerology to create imbalance in society.

Teacher: This is the promise I want from you.

Student: You taught me the entire concept of Numerology. Can you please recapitulate with me the various calculations and their meanings with me? I am really very curious and excited.

Teacher: Yes of course. You will learn about how to calculate Life Path number, Birthday Number, Expression Number, Hidden Potential Number, Karmic Lesson Number, Personality Number, Heart Desire Number, Karmic Debt Number, Challenge Number,

Pinnacle Number and Personal Year Number. You will also be able to understand meaning of each number and its meaning. For example- what is the meaning of Life path number 5, what is the meaning of Challenge number 1, what is the meaning of Pinnacle number 8, what is the meaning of Karmic Debt number 13 etc. and their respective solutions.

Student: Thank you Sir. I am very lucky to get you as my teacher. **Teacher:** All the best and God bless you.

Introduction to Numerology

What Is Numerology?

As per oxford dictionary Numerology is the branch of knowledge that deals with occult significance of numbers.

We are continuously getting cosmic vibrations/energies on earth but we do not understand these energies. There are some energy which are in favor of us and there are some which creates challenges.

Thanks to our Ancestors who did research on these energies and categorize each type of energy into particular numbers. I mean each number (& alphabetical character) represents particular types of energy. Once you explore the number, basically you are exploring the energy behind that. Therefore, in numerology we study the relationship of numbers and letters with our life and life events. It is an ancient science which reveals the blueprint of every human being's life and one of the most accurate and powerful self-help tools available today.

In other words, numerology reveals the blueprint of what your soul has pre-chosen to accomplish in this life. One of the benefits of this numerology is that it can reveal your destiny and life purpose and the life lessons you'll face along the way, which is valuable information if you want to make the most of your journey. Knowing yourself is the key.

Numerology is not only about predicting the future, or choosing the ideal partner, date, or name; It is far more than that,. It's the bridge between who you are now and who you have the

Jayant Kumar

potential to be. It's a stepping stone that enables you to live your best life and be the best that you can be.

In numerology Astrologer relates each numbers and alphabetical characters to particular number and believes that the particular number has some sort of cosmic vibration. As per Hindu astrology, Astrologer builds relation between numbers and alphabetical characters to a particular Number from 1 to 9 and each number from 1 to 9 is represented by Planets. For example: Number 1 represented by Planet Sun, Number 2 represented by Planet Moon etc. These planets (1-9 numbers) are influencing individual's characteristics.

Chaldean And Pythagorean System

No one exactly knows the origin of Numerology and when it started. The Pythagorean and Chaldean schools of numbers are the most commonly used. Pythagorean system is more popular especially in West but Chaldean Numerology is older. In this book, Chaldean Numerology has been used to determine Alphabetical numbers.

Pythagoras was a master mathematician born in Greece in the 6th century B.C; we all are familiar with his geometry theorems. However, He is also considered as a Farther of Modern Numerology. He spent many years of study in Egypt and other parts of the world and explore the ancient science of numbers. After that he brought his knowledge and experience to Greece and taught nearly forty years and established a college and philosophy of numbers.

There was a time when Astrology, Numerology and other occult studies were considered a religion not in the way we would know it today. Around 356 B.C; In the time of Alexander the Great, the Chaldeans believed that their knowledge of Numerology and Astrology went back at least 473,000 years. The Chaldean system of numbers is still in use today. The Chaldean system of numbers are also known as Mystic Numerology.

What Are The Number's In Numerology:

The Karmic Debt number are 13, 14, 16 & 19. Each has its own unique characteristics, and its own particular difficulties.

Numerology is based on the ancient idea that each of us takes re-birth as per our Past Karma. The good or bad result of this life depends on Past life deeds as well. The good gets rewarded but the mistakes we committed need rectification. Such errors cause us to take on additional burden in order to learn a particular lesson that we failed to learn in previous lifetimes. In numerology, this burden is called a Karmic Debt.

Challenge Number

Though challenges sound to be disturbing, they are yet vital for anyone. The main reason for such a statement is, the person becomes aware of the shortcomings, and can work on it. And most importantly, he/she learns to cope up with situations. This gives you opportunities to learn and ultimately a feeling of contentment.

The strength and weaknesses both are part of our life. Numerology teaches us life is an educational process that is meant to bring out and enhance our talents, and turn our weaknesses into strengths. This serves to complete our being. There are four challenges to be faced during our lives. For many of us, the same challenge is repeated, while others have four distinctly different lessons to learn. You must analyze the challenge number's energy surrounding and influencing you during each defined period of your life in addition to your Life Path Number.

Pinnacle Number

Your life is divided into four long-term cycles and each term has specific attributes that must be assimilated into your life. Each Pinnacle cycle brings demand and opportunity to you. It forces you to deal with qualities of that pinnacle number. Overall, each Pinnacle cycle shapes you and your life.

In nutshell, the Pinnacle Numbers is the energy surrounding and influencing you during each defined period of your life in addition to your Life Path Number.

Personal Year Number

The personal year number gives you clue as to what lies ahead in the coming year. Basically, your development and maturity builds in nine year stage. Each nine year period is considered as beginning and the end of a particular stage of development. These nine year cycle are called epicycle. Each epicycle brings new opportunities and lessons to be learned during that particular period. Each epicycle can be distinguishable by the way it brings

results and opportunities. In nutshell, this number tells you how the particular year will be for you.

Essence Cycle Number

The Essence number is the combined total of the Physical, Mental, and Spiritual Transits that are influencing you during a particular year of your life.

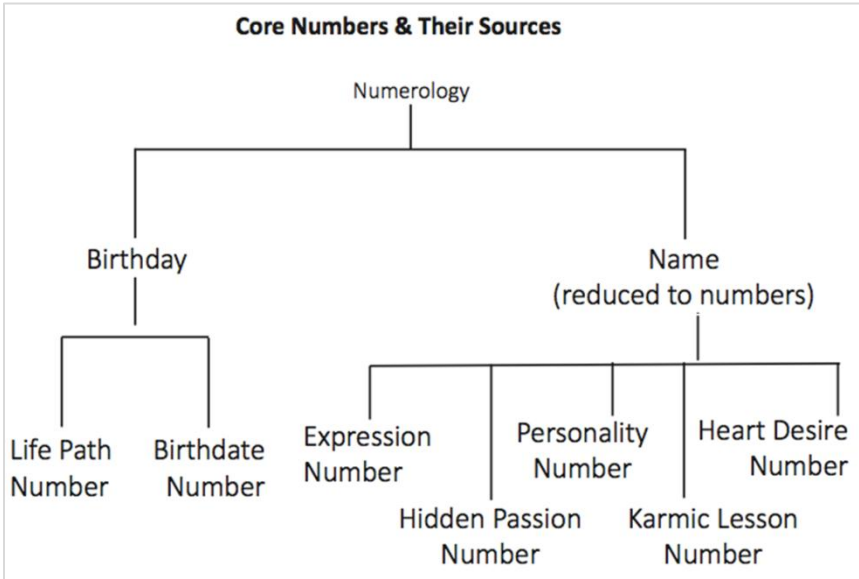

When it comes to know how the particular year or particular age will be for any individual, without considering Essence cycle number you cannot get exact idea. For example, if you want to know at age 24 how the timing will be, you must have to analyze Essence number for age 24 along with Personal Year number.

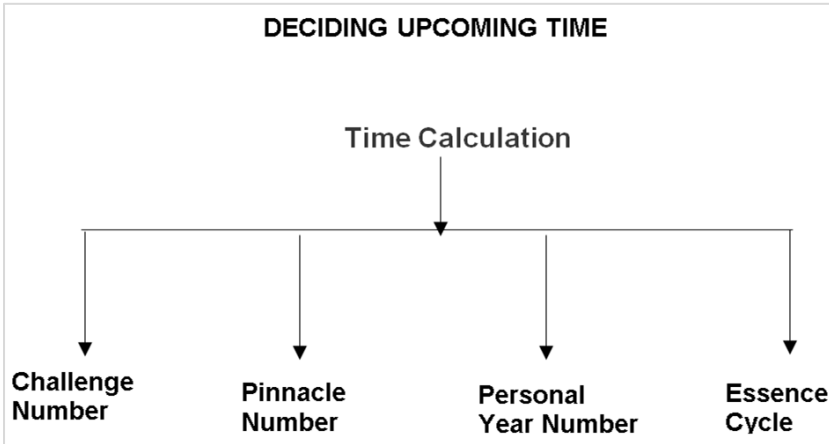

The Essence number is based on your name and it is yearly indicator of what event can occurred and how that can influence your life during that particular year.

On the whole, the Essence Cycle Number helps you obtain a fair idea about what may happen during the different periods of your lifespan. Each Essence Cycle Number has completely different characteristics.

NUMEROLOGY & YOU

Everyone is interested in knowing their future and Astrology is the only subject which studies the cosmic science.

There are a lot of people attracted towards astrology with majority inclined towards learning this mystic science. But unfortunately people don't know how to approach astrology as a subject and learn its basic concepts. They must know the tools to explore the cosmic science.

There are several books written on Numerology. Moreover, now days, a lot of website on the internet claim to provide learning Numerology, but lack in the planned systematic approach to beginners quest. Most of the books and internet articles fail to provide the knowledge and the process which would help a beginner learn and further explore Numerology. Because of this, the learner gets tangled in the complex approaches, difficult terminologies and too technical a language and finds the subject of numerology boring and difficult to grasp. This makes the new learner to quit the subject in between or be confused forever.

I have written this book to keep all these points in mind. I have given importance to the learner and kept all the topics which are not relevant to learner away from this book. I have designed this book more as a conversation rather than text book. I have put all the topics step by step so that student can learn this mystic subject with interest.

I hope you will enjoy this book and explore the cosmic vibration as much as I enjoyed while writing this book.

All the very best! Happy Learning!
